WHY ATTEND?

IMARC is Australia's only truly international mining event where you can connect with the entire mining industry.

Bringing together over 2500 decision makers, mining leaders, policy makers, financiers, technical experts, innovators and educators to hear from over 200 international speakers for four days of learning, deal-making and unparalleled networking.

Covering all aspects of mining from exploration to investment, production to optimisation through to technology, health and safety, policy and governance it truly is the one-stop event for all industry stakeholders.

- Network with 2500+ attendees from 50+ countries
- Interact with 150+ mining companies
- Gain insights from world leading experts in technological and innovative advancements in mining
- Experience the country's largest mining investment forum Mines and Money Australia, connecting miners with money and investors with opportunity
- Learn global best practice and direction of mining policy, which shapes the regulatory environment

MEET THE MINERS

Austmine's Meet the Miners speed networking series is a unique opportunity to get insights into what Heads of Technology, Projects and Innovation from some of Australia's biggest mining companies really want from their suppliers. So how does it work? Six representatives from different member companies will be gathered at a roundtable with one of our senior level miners, and have 15 minutes to listen to, question and seek advice from the miner, led by one of our moderators. After 15 minutes, the bell rings and you're onto the next table. The session will last one hour, spaces are filled on a first come, first serve basis and are strictly limited. Only Austmine members can pre-register - so book your place ASAP!

Wednesday 9 November

17:30 - 18:30 - Exhibition Hall

Pre-registration is open to Austmine members only

MINING FOR NON MINERS

Monday 7 November 2016
09:00 – 17:00

Mining for Non Miners will provide participants from a non-mining background with greater understanding of the operational practices pivotal to the mining industry, be able to interpret essential terminology and feel more comfortable interacting with core mining staff. It is ideal for those who are looking to achieve effective working relationships with core mining staff or who have peripheral contact with the mining industry.

At the completion of this course participants will be able to:

- Appreciate the significance of the mining industry;
- Understand frequently used terminology;
- Describe the use of different mining methods;
- Understand the principles of mine design and planning;
- Understand pit optimisation;
- Describe the impact of rehabilitation and environmental considerations;
- Understand the use of drilling and blasting;
- Describe essential pit services and safety operations;
- Describe the impact of Geotechnical considerations;
- Explore the costing implications of mining operations.

DISRUPTIVE TECHNOLOGIES

Monday 7 November 2016

09:00 – 17:00

Disruptive technologies are creating new opportunities and threatening established businesses at a faster rate than ever. To ensure continued growth and prosperity, the mining sector and METS companies will need to anticipate and respond quickly, making choices about where to invest. This will require a deep understanding of the emerging technology landscape – from automation and robotics to machine learning, analytics and the internet of things – as well as skills and innovation capacity to take advantage of emerging business models.

This workshop is aimed at the senior management of 4 to 5 targeted companies, to help them understand the technical landscape, to hear what companies have successfully implemented in other industries, and to make a start on adapting their business to suit. Participants will be offered facilitated engagement and discussion opportunities, to help develop the way forward with specific outcomes aligned with each company's plans.

At completion of this course companies will:

- Understand the landscape of data and digital disruption in mining;
- Identify company level opportunities and risks; and
- Develop an action plan to prepare for change and to be globally competitive.

with the scope and scale
and the intent of the conference.
It is one of the bigger conferences
around and I chose to support it
and this time around it seems to be
more optimistic than last time even
though times are still tough.
